SUMMARY

Senior backend developer with 5 years of experience designing scalable web services and APIs. Deep expertise in Python, Flask, SQL databases, and Linux infrastructure. Proven track record deploying production systems and mentoring junior developers.

EXPERIENCE

Senior Backend Developer — CloudBase Technologies, Amman

Jan 2022 – Present (3.5 years)

- Architected and deployed microservices using Python Flask and Docker, handling 500k+ requests/day.
- Designed relational database schemas in PostgreSQL and SQLite; optimized query performance by 60%.
- Built and maintained REST API documentation using OpenAPI/Swagger.
- Led migration from monolith to microservices architecture; mentored 3 junior developers.
- Managed all infrastructure on Linux (Ubuntu) with CI/CD pipelines via GitHub Actions.

Backend Developer — NexTech Solutions, Irbid

Jul 2020 – Dec 2021 (1.5 years)

- Developed internal CRM system backend using Flask and SQLite.
- Integrated third-party payment APIs and automated invoice generation.
- Maintained Git repositories and conducted code reviews.
